If possible give a full **tetrad** grid reference. This comprises two prefix letters and two numbers for the 10-km (*eg* SK49), plus the suffix tetrad letter from the tetrad grid shown to the right (*eg* SK49H)

E	**J**	**P**	**U**	**Z**
D	**I**	**N**	**T**	**Y**
C	**H**	**M**	**S**	**X**
B	**G**	**L**	**R**	**W**
A	**F**	**K**	**Q**	**V**

Tetrads = 2km x 2km

Use this form to record species using tetrads or 10-km squares during winter (Nov–Feb) and the breeding season (Apr–Jul), though you can submit evidence of breeding outside these periods. 'Using' means anything other than simply flying over, though records like Swallows taking insects in the air or hovering Kestrels do count as using the square. For birds flying over please put **F** in the 'Code' column to signify this. For each record provide at least a 10-km grid reference, but if possible, also the relevant tetrad letter (see above). Help with grid references can be found at www.birdatlas.net or see the key on an OS map. Evidence of breeding can often been seen without finding nests - see overleaf for details. If you make a nocturnal visit but find no nocturnal species (*eg* owls, Nightjar, Woodcock), enter 'NILNOCT' in the species column so that we know a visit was made.

10-km				Tetrad (optional)	Town, village or feature in tetrad or 10-km square	Day	Month	Year	Species name	Code	Office Use
